11a) If you get a message that reads "Network is unavailable, please check the network" it means that the connection has failed. Tap "OK" and repeat steps 6 - 10.

11b) If you get a message that reads "Device not responding Check demerit points and retry" it means that the connection has failed. You may need to put the SaunaLogic2 Control into pairing mode again, and repeat steps 6 - 10.

12) Once your K2 Control successfully connects to the SaunaLogic2 App, your App screen will pop up with a message stating "**Device added successfully**" and give you the option to edit the name of your SaunaLogic2 Control.

You may choose to keep the default name or rename it to something else of your choosing. Keep in mind that it is best to keep this name simple so that if you end up configuring it to work with Alexa, Google Assistant or Siri, it will be easier for the smart assistant to understand when you are trying to control the steam bath with voice commands.

Tap, "Done" if you decide to keep the default name.
